83-4378

Honorable William J. Casey Director Central Intelligence Agency Washington, DC 20505

Dear Mr. Casey:

This is in response to your letter of July 6, 1983, in which you requested the delegation of the Central Intelligence Agency (CIA) to assume full responsibility for maintenance and operation of the power plant at the McLean, Virginia Complex. The General Services Administration will continue intensive recruitment efforts to fill vacant positions. If we are unsuccessful in accomplishing this in the next 10 days, we will be pleased to discuss other alternatives, including the requested delegation, to provide a fully staffed power plant operation. In addition, we will continue to plan for the equipment replacement actions called for in the study by Weston Consultants in order to ensure a highly reliable power plant operation.

We share your deep concern regarding the importance of this facility, and will cooperate fully with the CIA in reaching a mutally agreeable solution to the concerns you have raised.

Sincerely,

RICHARD O. HAASE

Commissioner, Public Buildings Service
